

Walling & Landscaping

Environmental policy

The business activities of Axis have a direct impact on our environment and our planet's resources. Axis has an economic, social and moral responsibility to minimise any adverse impact from its activities on our environment.

To this end, Axis will seek to:

- Assess all environmental impacts of the business, both in the office and on site;
- Ensure that care of the environment is a key consideration in our work practices, processes and methods of operation.
- Be aware of and comply with current legislation;
- Integrate environmental objectives into relevant business decisions;
- Minimise waste at the point of planning, purchase & use;
- Recycle surplus materials;
- Dispose of waste responsibly;
- Influence suppliers of services to reduce their impact on the environment;
- Raise awareness of relevant issues among customers, colleagues and others who have an interest in our business;
- Lead by example.
